The Handbook of Global Science, Technology, and Innovation

Edited by Daniele Archibugi & Andrea Filippetti

This unique Handbook provides an in-depth overview of the themes and direction of science, technology, innovation, and public policy in an increasingly globalized world. Leading authorities discuss current debates, research issues, and prospects, and present a foundation for the development of global policy.

- Presents a state-of-the-art overview of science, technology, and innovation in the context of globalization and global policy
- Offers an accessible introduction for students, researchers, and policy makers in the fields of economics, sociology, political science, business studies, global studies, and international relations
- Addresses emerging issues and provides clear policy implications and analysis in each chapter
- Includes crucial coverage of the activities of established and emerging geographical areas
- Explores the ways in which reforms in intellectual property rights and world trade have been affected by the increasingly international flows of knowledge, technology, and innovation
- Examines major policy trends, including a significant shift toward private scientific research, and a heightened awareness amongst policy-makers of the economic and technological impact of scientific activity
